Salient

Update on Shiloh Church Road Removal Action, Nathalie, VA: Operations to treat and dispose of mixed RCRA/PCB waste continue. Mixed waste is being treated on Site with a commercial stabilizing agent. Post-excavation results revealed additional PCB contamination (>50 mg/kg) is still present in most of the previously excavated areas. EPA's contractor is performing additional excavation, greater than 3 feet below surface in some areas. Additional sampling was performed in the wooded areas of the Site. Several of these areas will also require removal action due to elevated levels of PCBs. To date, EPA has treated >2200 tons of mixed waste and disposed of >3600 tons of PCB remediation waste. Onsite operations will be suspended from 12/19-1/3 for holiday break. (Contact; Chris Wagner 804-337-3049)	Wagn

Thanks

I was trying to see what I entered on TOES

Thank you

Chris
